Core Technical Skills

React
JavaScript (ES6+)
TypeScript
Angular
Vue.js
Tailwind CSS
Java
Node.js
Spring Boot
RESTful APIs
Apache Kafka
PHP
MySQL
Redis Cache
Ms/SQL
PostgreSQL
MongoDB
Google Cloud Platform(GCP)
Azure DevOps
Docker
Kubernetes
CI/CD pipelines
Git
Agile/Scrum

Profile

Fullstack Developer with 5+ years of experience architecting and delivering cloud-based, scalable web applications used by large consumer audiences. Deep hands-on expertise in Node.js, React, and MySQL, with proven ability to build high-performance, consumer-facing marketplace platforms. Experienced in designing and optimizing database structures for high-traffic environments, implementing responsive and mobile-first frontends, and driving backend scalability through microservices architecture. Fluent in English. Track record of partnering closely with product owners and UX designers to ship features that improve user experience at scale.

Professional Experience

Full-stack Developer, DAZOQ, Linköping

SEPT 2025 — JAN 2026

- Architected and delivered a consumer-facing, interactive marketplace tool (Node.js + React + MySQL) enabling 1,000+ industrial clients to manage sensor/gateway placements - eliminating Figma-based workflows and reducing troubleshooting time by an estimated 60%.
- Engineered a high-performance React frontend with drag-and-drop UI, Framer Motion animations, and real-time collaboration, implementing role-based access control (JWT) and RESTful API integration for seamless multi-user data management.
- Designed and optimized MySQL database schemas using normalized structures, prepared statements, and utf8mb4 encoding to handle concurrent user sessions and ensure secure credential management.
- Built a fully automated Python/Pandas ETL data pipeline that scraped, cleaned, and exported 3,000+ structured company records - achieving >95% region classification accuracy using fuzzy matching and reducing manual research effort by 80%.

Full-stack Developer, Mitra Softwares, Shivamogga

JUL 2017 — JUL 2022

- Developed and maintained full-stack cloud-based applications (React, Angular, TypeScript, Node.js, Java/Spring) serving thousands of end-users, consistently delivering responsive, scalable, and performant consumer-facing interfaces.
- Improved frontend performance by 30% through code splitting, lazy loading, and component optimization, delivering a significantly improved user experience across web and mobile environments.
- Built and maintained CI/CD pipelines using Azure DevOps and Git, reducing release cycles by 40% and enabling high-frequency, reliable deployments aligned with Agile sprint cadences.
- Optimized MySQL and PostgreSQL database queries for high-traffic production environments, contributing to cloud migration on GCP and mentoring 3+ junior developers in clean architecture practices.

Education

Master of Science (MSc) in Agile and Lean Development, Blekinge Tekniska Högskola, Sweden

2025

Bachelor of Engineering (Electronics & Communication), STJIT Engineering College, Ranebennur

2013 — 2017
